ZENITAR 2/35

The high aperture lens in a retro design has been developed for mirrorless full-frame cameras. The high aperture allows to take pictures in poor light conditions without using a tripod and to get a blurred background effect that is so important in art photography.

The mount is compatible with the bayonet type:

Sony E

Specifications:

Focal length	35 mm
Angular field	62,5 °
Lens groups/elements	5/7
Max. aperture	2
Min. aperture	22
Aperture blades	9
Min. focusing distance	0,5 m
Filter mounting size	46 mm
Weight	300 g
Diameter x length (from mount)	61,5 x 47,2 mm
